EDUCATION

BSc. Computer Science Engineering [Current CGPA 4.32]
University of Debrecen, Debrecen, Hungary — Expected - Jan 2022

WORK EXPERIENCE

Teaching assistant
University of Debrecen, Debrecen, Hungary — Sept 2020 - Jan 2021

- Taught Computer Aided Mathematics and Visualization to a class of 24 students during the semester 2020/21/1 at the Faculty of Informatics, University of Debrecen.
- Application used - GeoGebra, MATLAB with the Symbolic Math Toolbox.

IT Intern
Navayuga World School, Nellore, India — July 2019 – Sept 2019

- Went over the school's Microsoft 365 contract and enabled all work laptops with the complete Microsoft suite and also coached the staff to use it to its maximum potential.
- Conducted a workshop where I laid out the basics of cloud computing and cloud sharing and enabled the teachers to collaborate and work on files and projects together.

SKILLS

Programming Languages - C, Java, MATLAB, Python, C#
Libraries and Frameworks - TensorFlow, NumPy, Matplotlib, Symbolic Math Toolbox
Mobile Development - Android Studio
Desktop Development - .NET Framework
Version Control - Git
Familiar with - ARM ASM, x86-64 ASM, SQL, VHDL in Xilinx Vivado, LabVIEW, Microsoft Azure, JavaFX, Kotlin
Office Applications - Microsoft Excel, Microsoft Word, Microsoft PowerPoint

PROJECTS

- **Image Analyser [Java, Microsoft Azure, Android studio]**
  This android app lets the user pick an image from the gallery and then scans a dataset of over 100,000 images and 10,000 classes trying to identify a few elements in the image.
- **Custom Object Detection with TensorFlow 2 [TensorFlow, Python, Microsoft Azure]**
  A custom model was created using TensorFlow 2 on a novel dataset. Dataset consisted of 2,400 images and had an accuracy of 85%.

- **Custom Object Detection with TensorFlow 2 Lite on Raspberry Pi [TensorFlow, Python, Microsoft Azure, Raspberry pi 4]**
- A custom model was created using TensorFlow 2 Lite on a novel dataset. Dataset consisted of 2,400 images and had an accuracy of 85%. The tests were done on a Raspberry Pi 4.
- **Meptun [Java, JavaFX, H2 DBMS]**
  This Windows/Mac based application developed in an agile environment lets students see their basic information, the courses taken, ability to post on forums, list of relevant teachers and their emails and a built-in email client to send emails to the relevant teachers.
- **Veer's Expense Report [Java, Android Studio]**
  A simple android app which lets the user track all my expenses and see image proofs for those expenses.

CERTIFICATES

- **Machine Learning by Stanford University** [www.coursera.org]
- **Deep Learning Specialization by deeplearning.ai** [www.coursera.org]
- **Improving Deep Neural Networks by deeplearning.ai** [www.coursera.org]
- **Convolutional Neural Networks by deeplearning.ai** [www.coursera.org]
- **Neural Networks and Deep Learning by deeplearning.ai** [www.coursera.org]
- **Structuring Machine Learning Projects by deeplearning.ai** [www.coursera.org]
- **Sequence Models by deeplearning.ai** [www.coursera.org]
- **CCNA Routing and Switching: Introduction to Networks** [Cisco Networking Academy]
